

LAVOISIER COPOLYMER GLOVES

HEALTH CARE and EXAMINATION GLOVES

PRESENTATION

Copolymer gloves are single use. Intended for health professionals (nurses, doctors, midwives).

Used in hospitals, clinics, laboratories and for hospitalization care, they are essential to ensure safe health care and examinations.

Used in obstetric gynaecology, in place of the finger-stall, they ensure optimal safe health procedures for user and patient.

To prevent allergic reactions they contain neither latex nor powder.

DESCRIPTION

- ◆ Copolymer film composition: 11% EBA * and 89% polyethylene.
Combining these elements offers a glove thin, flexible and extremely elastic (up to 400%).
Offering comfort and ease in use. Ensuring user an excellent tactile sensitivity with no weakness in the fingers.
- ◆ The copolymer glove is presented on medical packaging. High tensile strength. Very easy to put on and remove.

* EBA = Ethylene Butyl Acrylate

- ◆ Paper and film used to manufacture gloves can be recycled and produce no harmful effects to the environment.
- ◆ Sterilization by ethylene oxide radiation.

PACKAGING
